

# PX130 - 170

Wood chipper

**BRUGGER**

## For every application!

The drum chippers Brugger PX130 e PX170  
Have been developed for both a private and a  
professional use.

### Features:

- High level of security
- Continuous feeding retraction
- Power take-off drive
- 360° swivelling chip ejector

### Advantages of the PX130 - 170:

#### Onboard hydraulic system!

The integrated hydraulic system eliminates the need for a connection to the tractor's hydraulic system, thus improving operation and flexibility of use.

#### Maximum security!

The PX130 and PX170 models have been built to the latest safety standards.

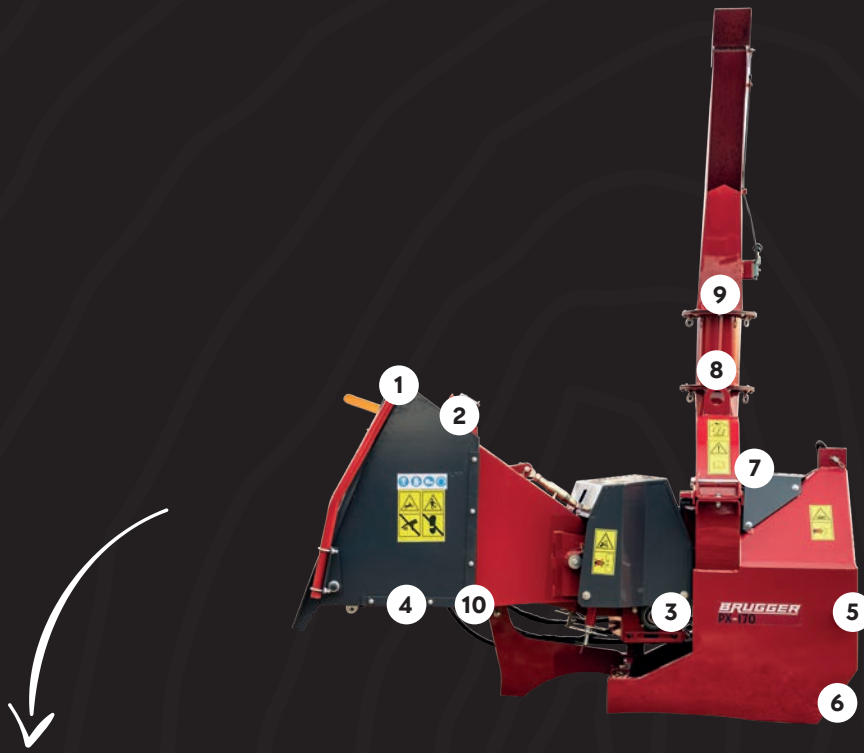

#### Hydraulic feeding!

The chipper is equipped with a hydraulic feeding system that can be infinitely adjusted.

### Components:

- |                                     |                            |   |                                   |
|-------------------------------------|----------------------------|---|-----------------------------------|
| 1. safety bar (retraction stop)     | 3. hydraulic feed rollers  | 6. hydraulic oil tank with pump             | 8. chip ejecter extension         |
| 2. emergency stop (retraction stop) | 4. retractable feed hopper | 7. grease nipple for main shaft lubrication | 9. swivelling chip ejection lance |
|                                     | 5. three-point hitch CAT 1 |   | 10. feeding speed adjustment      |

### Technical data:

<b>Manufacturer:</b>	Bruggger	Bruggger
<b>Model:</b>	PX130	PX170
<b>Transmission:</b>	PTO	PTO
<b>Requested power supply:</b>	30- 70 CV	40-100 CV
<b>PTO speed:</b>	540 RPM	540 RPM
<b>Maximum log diameter:</b>	130 mm	170 mm
<b>Number of knives:</b>	4	4
<b>Feeding:</b>	hydraulic	hydraulic
<b>Approximative weight:</b>	420 kg	570 kg

## Wood chipper

The Brugger PX130 and PX170 chippers have been specially developed for both **private and professional use**.

The Brugger PX130 and PX170 drum chippers have been specially developed for **PTO operation**, to ensure efficient chipping in agricultural and forestry applications.

With the ability to process large diameter logd, **up to 13 cm (PX130) and 17 cm (PX170)**, these chippers offer a powerful solution for processing logs and branches in **agricultural and forestry applications**.

The **foldable feed hopper makes** the chipper more compact and easier to handle and transport from one place of use to another.

Built to the latest safety standards, the chippers guarantee a reliable and safe solution for the user. The material feed into the Brugger PX130 and PX170 chippers is ensured by **two hydraulically driven rollers**.

Thanks to their robust design and the drive power, they handle even the most difficult materials effortlessly!

**Thanks to their purely mechanical operation, the chippers are extremely robust, low-maintenance and easy to repair.** With a weight of 420 - 570

kg and compact dimensions, they are easy to transport despite their impressive performance.

The hydraulic roller drive allows infinitely variable adjustment of the advance speed, which enables precise adaptation to different materials and work requirements.

**Optimised for PTO drive, these models allow a versatile use in agriculture and forestry.**

The retractable feed hopper of the Brugger PX130 and PX170

chippers is particularly practical for handling and transport.

**The integrated hydraulic system eliminates the need for a connection to the tractor's hydraulic system, improving the operation and user-friendliness of the machine.**
